* P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)
This house was built in 1941 in the Mission Revival style. The house is situated on a corner lot and is one story with a flat roof and parapet walls with square vents. The exterior wall material is smooth stucco. The central focal point is a projecting gable porch that was added to the house. There are recessed segmental arch framing above the windows and door. The windows are fixed single-pane. The side entrance off Kalmia has an enclosed porch with triple arch and contemporary window screens. Security wrought iron-work is attached to the curved back wall with an arched gate. There is an attached single car garage and carport addition on the Kalmia side. The house is located in the community of Burlingame. It is in good condition. The total usable floor area is 1,681 square feet. The house features 3 bedrooms and 1 bath. The total lot area is 6,600 square feet.

The Burlingame Historical District consists of some forty acres of land, originally developed in 1912, extending along San Marcos Street to the north, Kalmia Street to the south, 32nd Street to the east, and 30th Street to the west. The tract's architectural significance is expressed in its curvilinear street plan, which follows the area's natural contours. The original planners, Joseph McFadden and George Buxton, demarcated it with rose-colored sidewalks, the only such area in the City of San Diego to do so. Limited access to the tract at the time of its incorporation has left it with a quality of an integrated and separate development distinct from the surrounding community. The tract is a major example of an early twentieth century local experimental approach to real estate development utilizing a "team of specialists" to develop, market and deal exclusive real estate property. Its developers were extremely active in local real estate development during this time. Architectural control was maintained through the use of consulting architect, William H. Wheeler, and restrictive building covenants. Later on, these controls would be enforced through the watchdog efforts of Burlingame Women's Club, allegedly the earliest and oldest neighborhood organization in San Diego. Located within the tract is an eclectic mix of over two hundred unique and interesting houses, each a representation of pre-World War One suburban residential architecture; including Craftsman, Mission, Spanish Colonial and Pueblo Revivals, as well as Prairie School, Art Deco, Ranch, Colonial Revival and many other individual hybrid combinations of several styles.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Burlingame Historical District consists of some forty acres of land, originally developed in 1912, extending along San Marcos Street to the north, Kalmia Street to the south, 32nd Street to the east, and 30th Street to the west. The tract's architectural significance is expressed in its curvilinear street plan, which follows the area's natural contours. The original planners, Joseph McFadden and George Buxton, demarcated it with rose-colored sidewalks, the only such area in the City of San Diego to do so. Limited access to the tract at the time of its incorporation has left it with a quality of an integrated and separate development distinct from the surrounding community. The tract is a major example of an early twentieth century local experimental approach to real estate development utilizing a "team of specialists" to develop, market and deal exclusive real estate property. Its developers were extremely active in local real estate development during this time. Architectural control was maintained through the use of consulting architect, William H. Wheeler, and restrictive building covenants. Later on, these controls would be enforced through the watchdog efforts of Burlingame Women's Club, allegedly the earliest and oldest neighborhood organization in San Diego. Located within the tract is an eclectic mix of over two hundred unique and interesting houses, each a representation of pre-World War One suburban residential architecture; including Craftsman, Mission, Spanish Colonial and Pueblo Revivals, as well as Prairie School, Art Deco, Ranch, Colonial Revival and many other individual hybrid combinations of several styles.

B11. Additional Resource Attributes: (List attributes and codes):

* B12. References:
